

ROLLING SHUTTER

Strong • Secure • Durable • Space Efficient

1. PRODUCT OVERVIEW

Rolling Shutters are durable and space-efficient door systems designed to provide security, controlled access and protection for commercial, industrial and residential openings.

The shutter curtain rolls vertically into a compact coil above the opening, making the system suitable for locations where floor and side space is limited.

Rolling Shutters can be manufactured in different materials, profiles, finishes and operating configurations according to the application and project requirements.

They are suitable for shops, warehouses, factories, commercial buildings, garages, industrial facilities and service areas.

Product Highlights

SECURITY	Provides a strong physical barrier and controlled access.
SPACE SAVING	Vertical rolling operation requires minimal floor space.
DURABILITY	Suitable materials can provide reliable long-term performance.
CUSTOM DESIGN	Available in different sizes, profiles, materials and finishes.
EASY OPERATION	Manual and motorized configurations are available.
AUTOMATION	Can be integrated with access control and automation systems.

2.ROLLING SHUTTER TYPES

1.Manual Rolling Shutters

Manual Rolling Shutters are operated using a hand chain, spring mechanism or other manual operating arrangement. Suitable for shops, small warehouses, commercial premises, service areas and smaller industrial openings.

2.Motorized Rolling Shutters

Motorized Rolling Shutters use an electric motor for convenient opening and closing. The system can be operated using push buttons, remote controls or integrated control systems.

3.Industrial Rolling Shutters

Industrial Rolling Shutters are designed for larger openings and demanding industrial environments. Heavy-duty components can be selected according to project requirements.

4.Perforated Rolling Shutters

Perforated Rolling Shutters provide security while allowing visibility and ventilation through the shutter curtain. Suitable for shopping centres, retail stores, commercial buildings, showrooms and parking areas.

5.Transparent / Vision Rolling Shutters

Vision Rolling Shutters provide visibility through the shutter while maintaining controlled access and security. Suitable for commercial and retail applications where product visibility is important.

6.High Security Rolling Shutters

High Security Rolling Shutters are designed for applications requiring enhanced physical protection. Stronger profiles, reinforced components and suitable locking arrangements can be selected according to the required security level.

3.KEY FEATURES

Strong & Durable Construction	Rolling Shutters can be manufactured using steel, galvanized steel, aluminum or other suitable materials according to the application.
Space-Saving Design	The shutter curtain rolls vertically above the opening, reducing the required floor and side space.
Security	Provides a physical barrier against unauthorized access and helps secure the premises when closed.
Motorized Operation	Motorized systems provide convenient opening and closing for larger or frequently used openings.
Custom Sizes	Shutters can be designed according to the required opening dimensions.
Multiple Finishes	Different colors and surface finishes can be selected according to architectural and project requirements.
Low Maintenance	Properly installed and maintained shutters provide reliable long-term operation.
Automation Integration	Motorized shutters can be integrated with access control, remote operation and building automation systems where required.

Influitive Automation LLP

Reliable Industrial Door & Automation Solutions

Looking for a reliable solution for **Fire Rated Doors, Industrial Doors, Rolling Shutters, Sliding Doors, Sectional Doors, RFID, BOOM Barriers , CCTV Systems , Bio-Matrices Devices , Fire Alarm Systems or Automated Access Systems?**

Our team provides **customized solutions, technical consultation, installation, and project support** based on your site requirements and application.

Why Choose Us?

- Customized solutions for industrial & commercial applications
- Professional technical support
- Quality-focused products and solutions
- Installation & project assistance
- Solutions designed according to site requirements
